

Retail Consolidation

Our retail consolidation solutions ensure your products arrive on-time to retailers for purchase by end consumers. Our team of retail logistics experts help you achieve compliance with the largest U.S. big box retailers while minimizing transportation costs.

RETAIL CONSOLIDATION

Multiple vendor orders destined for the same distribution center are picked, packed, combined and shipped on a single outbound truck, decreasing the transit time compared to typical LTL (Less-than-Truckload) shipments.

Our team builds a customized program around your exact needs with the flexibility to accommodate unique requests. We work closely with suppliers to ensure inventory arrives On Time and In Full (OTIF).

Our retail consolidation programs are designed to reduce supply chain costs, increase efficiencies, improve inventory visibility and continuously improve your retail supply chain.

WAREHOUSING

Our national network of food-grade warehouse facilities are strategically located along major shipping lanes, placing your inventory near major retail distribution centers. Our warehouses are regularly audited by the American Institute of Baking (AIB) and the Current Good Manufacturing Process (CGMP) to ensure quality practices.

- 2.5 Million Sq. Ft. of Food-Grade Warehousing Space
- Dry & Temperature Controlled
- Cross-Docking Capabilities
- Retail Case Picking

VALUE ADDED SOLUTIONS

Our team also provides value added solutions to help support your retail logistics program:

- Technology - Access to our state-of-the-art Warehouse Management System (WMS) provides you with complete inventory visibility and a robust tool for inventory management.
- Label Printing - We have the ability to print all barcode and label formats on-site. Custom UPC labels can be developed with scanned logos.
- Re-coup and Re-pack - We have the experience and the equipment to handle any re-coup or re-pack needs.
